Dear Valued Customer:

Donnelly Bros Inc. is the manufacturer of APG#2 (All Purpose Grease #2), and it is manufactured in the United States of America. Located on the product container is a stamp indicating the manufacture date. Please use this date in determining the expiration of the grease.

The manufactured date can be found on the products listed below respectively:

- Jars (1lb) - bottom
- Jars (2oz) - lid
- Pails (5gal) – side wall
- Tubes (14.5oz) – side wall
- Tube (3oz) – side wall
- Spray (12oz) – lid

The expected shelf life of APG#2 in plastics jars (1lb and 2oz) and pails (5gal) is 7 years. For foiled cardboard tubes (14.5oz and 3oz) and spray cans (12oz), the expected shelf life is 5 years. If the grease starts to separate or lose its properties that render it ineffective prior to it's expiration date, please contact Donnelly Bros Inc. for a replacement.

If you have any questions or concerns regarding APG#2's shelf life, please contact us. As always, we appreciate your business and look forward to helping you with your injection molding needs.

Sincerely,

James Donnelly
General Manager
